EDUCATION

Vanier College **Montreal, QC**
AEC Software Development: Secure Desktop, Mobile & Web Applications *Completed: November 2025*

TECHNICAL SKILLS

Languages: Java, Python, HTML, CSS, JavaScript
Frameworks: Spring Boot, Flask, React, Bootstrap
Databases: PostgreSQL, SQL
Tools: Git, GitHub, Maven, Postman

PROJECTS

PrintCraft : Custom Print Shop
Python, PostgreSQL, Flask, HTML, CSS, JavaScript, REST API, Postman

- Developed a full-stack e-commerce web application supporting user authentication, product browsing, shopping cart, and checkout workflows.
- Designed relational database schemas with optimized SQL queries to support persistent storage of users, products, and orders.
- Implemented security features including CSRF protection, password hashing, and input validation to improve application reliability.

WhiskerWatch:
Java, Spring Boot, React, PostgreSQL, REST API, Postman

- Engineered a RESTful backend using Spring Boot and PostgreSQL, developing booking, sitter search, and user management endpoints; structured scalable database schemas to support efficient reservation workflows and persistent data storage.
- Built a dynamic React frontend utilizing component-based architecture and hooks for state management; integrated REST APIs to enable real-time sitter browsing, booking interactions, and responsive user experiences.
- Implemented full-stack integration between React client and Spring Boot services, ensuring seamless data exchange, clear separation of concerns, and reliable end-to-end functionality across authentication and booking features.

Deez Queez : Web Quiz Application (Live: https://dqueez.com/)
JavaScript, HTML, CSS, NodeJS

- Developed dynamic question rendering supporting multiple input formats (radio, checkbox, text input), enhancing quiz flexibility and user interaction.
- Debugged and resolved frontend validation and UI logic issues, improving application stability and form reliability.
- Improved project documentation by restructuring README guidelines and setup instructions, enabling smoother onboarding for new users and contributors.

WORK EXPERIENCE

Fujitsu Network Communications **Montreal, QC**
IT Support Specialist *July 2023 – December 2024*

- Performed post-upgrade validation and troubleshooting of network infrastructure, including firewalls and IP-based systems, improving operational stability.
- Collaborated with cross-functional teams to enhance system performance and data security, ensuring smooth operational continuity and minimizing disruptions.
- Diagnosed and resolved technical issues within enterprise network systems, strengthening problem-solving and production support skills.

Volkswagen **Montreal, QC**
Operations Support Representative *August 2023 – January 2024*

- Performed high-accuracy validation of financial and contractual documentation within strict SLA requirements, demonstrating attention to detail and data quality assurance.
- Identified and resolved inconsistencies in business records by applying structured verification workflows to support compliance and operational integrity.
- Supported administrative and transactional processes in a production environment, strengthening analytical thinking and problem-solving skills.
