EDUCATION

Vanier College **Montreal, QC**
AEC Software Development: Secure Desktop, Mobile & Web Applications *Sept 2024 -Nov 2025*

- **Relevant Coursework:** Programming Fundamentals, Data Structures, Database Management Systems, Algorithms and Data Structures, Object-Oriented Paradigm, Financial Data Analysis, Business Intelligence

PROJECTS

WhiskerWatch : Decoupled Full-Stack Pet-Sitting App | *Java, Spring Boot, PostgreSQL, React*

- Designed RESTful APIs using Spring Boot to support booking, user management, and search features within a scalable client-server architecture.
- Implemented a responsive React interface utilizing component-based architecture and state management for dynamic user interactions.
- Integrated frontend and backend systems to enable efficient data flow, ensuring scalable and maintainable full-stack application architecture.

PrintCraft : Full-Stack E-Commerce Platform | *Python, PostgreSQL, Flask, HTML, CSS, JavaScript*

- Built a full-stack web application enabling secure user authentication, product browsing, shopping cart, and checkout workflows.
- Designed layered architecture (controller, service, repository) to improve scalability and maintainability.
- Applied secure development practices including CSRF protection, password hashing, and server-side validation to ensure data integrity and application security.

Deez Queez : Web Quiz Application | *JavaScript, HTML, CSS, NodeJS, PostgreSQL*

- Constructed dynamic frontend components supporting multiple input formats (radio, checkbox, text) to enhance user interaction.
- Deployed the application to a live production environment (https://dqueez.com/), enabling real-time access and end-to-end functionality.
- Coordinated team development using Git workflows and improved project documentation to support maintainability and collaboration.

WORK EXPERIENCE

Fujitsu Network Communications **Montreal, QC**
IT Support *July 2023 – December 2024*

- Executed post-upgrade validation and troubleshooting across network infrastructure including firewalls and IP-based systems, reducing operational incidents and improving system stability.
- Diagnosed and resolved technical issues across enterprise environments, collaborating with cross-functional teams to uphold data security standards and ensure production continuity.
- Developed structured troubleshooting workflows to systematically isolate and resolve recurring infrastructure issues, strengthening production support capabilities.

Volkswagen **Montreal, QC**
Operations Support Representative *August 2023 – January 2024*

- Performed high-accuracy validation of financial and contractual documentation under strict SLA requirements, maintaining data quality standards and compliance integrity.
- Identified and resolved record inconsistencies using structured verification workflows, supporting audit readiness and operational accuracy.
- Supported transactional and administrative processes in a high-volume production environment, applying strong analytical thinking to flag and resolve exceptions.

SKILLS

Languages: Java, Python, HTML, CSS, JavaScript, SQL, C#
Developer Tools: Git, VS Code, Visual Studio, IntelliJ, Eclipse, Vim, JUnit
